Overview

Family Engagement On-Demand is an online platform for schools that provides families with 24/7 access to streaming videos on academic and social/emotional topics to help them support their child's learning at home. The platform features videos in English and Spanish for PK-12th grade families. Administrators can use the data dashboard to keep track of families who are engaging with the platform at home. The platform also has capacity building resources to support parent coordinators and family engagement liaisons. Parent coordinators will also have the opportunity to participate in a virtual family engagement monthly live network sessions with colleagues around the nation to share best practices, address common barriers, and learn about some of the exciting innovations in family engagement.
