Hi Diane,

Mr. Matthews would like to request permission for an assembly given by The Fire Safety House program at Cooperman Barnabas Medical Center. I have them scheduled to come October 9, 2024 with a rain date of October 10, 2024. This will be for our 3rd grade class and will take place outside on the playground.

The Fire Safety House is a working classroom, geared for 3rd grade, designed to simulate realistic emergency scenarios in a controlled environment by bringing awareness to common household fire hazards. It is a free assembly.

Please let me know if I've missed anything in order to have this Board approved.

Thanks so much and have a great weekend!!
